Management		

EXPERIENCE

Ninja Multimedia

04 / 2015 - Present

Director of Interactive Development

Focus on the development of mobile, web, responsive design, and other interactive technologies. Additionally, lead the interactive development team by improving process, documentation, and standards.

What's Up Interactive

12 / 2013 - 04 / 2015

Director of Technology Services

On top of front-end development duties I was responsible for leading the front-end team, meeting with clients, establishing/maintaining processes, and working with all levels of the project life cycle within a given project.

- Focus on front end tech such as HTML5, CSS3, and jQuery
- Produce prototypes from wireframes and design.
- Focus on user interaction and quality of code in relation to load time, efficiency, and readability.
- Meeting with clients and working the design team to reach a goal.
- Working with third party vendors both local and overseas.
- Can also speak in regards to sever and back-end topics and languages.

Aside from producing code and working with clients, this role also required me to mentor other developers to improve their knowledge and skill set.

What's Up Interactive

07 / 2012 - 12 / 2013

Sr. Front End Developer

Work alongside Jr developers and the VP of Technology Services to create amazing web projects.

- Utilized web technologies such as HTML5, CSS3, AJAX, and jQuery
- Produce prototypes from wireframes and design.
- Assisted in QA of sites.

- Ability to code cross browser with little editing needed upon completion.

Vegan Renegade

09 / 2011 - Present

Web Master

Created a custom WordPress theme and plugins to represent health based company.

- WordPress based site
- Custom template
- Custom plugins
- Responsive design

GO BIG LABS

01 / 2011 - Present

Owner

Personal freelance business. I do all web work: design, develop, and both. If a client needs a full solution I can create a web presence they can be proud of. Additionally, if a designer needs a site coded or a developer needs a design I can work with other web professionals as well.

Gluten Free Cutie

02 / 2012 - 03 / 2012

Web Master

Created the company's first website. Made use of HTML5 layout, CSS3 elements such as shadows, transformations, and keyframes. I provided a complete solution including design, development, and training.

- Created 3 unique designs for client
- HTML5 based layout
- Use of CSS3 for modern browsers
- Designed, developed, and trained in 30 days

Tortuga Twins, Inc.

07 / 2011 - 02 / 2012

Web Master

Complete solution WordPress site. Site was created based on a Joomla theme, adjusted for branding. WordPress site was built from scratch using a provided Photoshop file. After major edit to the design, site was developed from the ground up. Some elements include: featured posts, multiple categories, multiple authors, paid memberships, protected member only area, and non-WordPress integrated store.

- Custom WordPress design from Joomla template
- Multi-level author site
- Integrated non-WordPress site
- Worked closely with client to ensure the site met branding needs
- Paid member only areas
- Seamlessly connected non-WordPress store with the WordPress environment including member discounts

Chattahoochee Technical College

11 / 2009 - 2012

Web Master

Handle all web design and development needs for Chattahoochee Technical College. This includes html 5, CSS3, PHP, jQuery, javascript, ODBC, SQL, Photoshop CS5, and maintaining a custom CMS I created to run the entire site.

- School's first web master
- Migrated entire site from hardcode to database driven
- Implemented new technology such as CSS3, HTML5, and jQuery.
- Created custom Content Management System, TalonCMS, to control all areas of the website.
- Worked with head of Print and Social Media to establish the school's external presence and create standards for their social media campaigns.

Matt Hughes Art

07 / 2009 - 08 / 2009

Web Developer

<http://www.matthughesart.com>

Created fully driven CSS, PHP, and MySQL site based on artist design. The website is completely dynamic updated instantly by the owner using PHP / MySQL forms I developed allowing the website to populate automatically.

- Created without need of WYSIWYG editor
- Code implemented: PHP, MySQL, CSS, HTML, Javascript,
- Created a custom CMS for the user to run themselves to make changes

Digital Blue

03 / 2007 - 05 / 2009

Quality Assurance Lead

<http://www.digiblue.com>

Originally brought on as a contract team member in a manual testing role. Advanced to permanent position and promoted to QA Engineer Lead within one (1) year. Created test plans and test cases based on Project Manager documentation using Spiratest. Led QA testers through product development and conducted meetings with Project Managers and Developers to deliver quality products on time.

- Promoted to QA Lead Engineer within one (1) year
- Created QA standards document
- Created Visual Basic based tools for Project Managers and QA
- Led media player product received parent's choice award.
- Contributed to product concepts for R&D
